

Web Development Workshop Leader/Content Developer

TUMO Center for Creative Technologies is looking for a Web Development specialist to join the Educational Content Development team to lead Web Development workshops, create content and design educational material for TUMO's students across all our centers, working year-round to develop and fine-tune the educational curriculum at TUMO.

Duties and Responsibilities

- Design and lead Web Development workshops for TUMO's students.
- Work in Yerevan but travel to other Tumo locations at least twice a year for month-long workshops
- Develop students' skills through designing educational material for student self-learning.
- Collect and evaluate students' results at the completion of every workshop and store them for their portfolios
- Examine students' self-learning results and provide daily feedback to them
- Other duties may be assigned

Education and Experience

- University Degree related to Web Development or an affiliated field from a leading institution of higher learning and in-depth knowledge of the subject
- Work experience in the specified field is a plus
- Experience in education and ability to work with teenagers is a plus
- Excellent communication skills and public speaking ability
- Software knowledge: Microsoft Visual Studio, Sublime Text (or similar IDE or code editor)
- Language: Armenian (required), English (preferred)
- Strong research skills
- Ability to work independently and part of a team
- Ability to maintain deadlines and ensure high productivity

Application procedure:

Interested candidates should submit a resume and by email to: jobs@tumo.org by the deadline. In the subject line of your email, please mention "**Web Development Workshop Leader/Content Developer**". Only short-listed candidates will be notified.

Application deadline: 20.02.2018

What is TUMO?

TUMO is a free after-school program designed for teens. Since the program's launch in 2011, four TUMO centers have opened their doors in Armenia: in Yerevan, Dilijan (in collaboration with the Central Bank), Gyumri and Stepanakert (in collaboration with AGBU). A new, fifth TUMO center is planned to launch in the northern border village of Koghb, in Tavush, in 2018. Under the Tumo educational program, students get acquainted with four main focus areas: animation, web design, game development and filmmaking; and ten complementary skills including robotics, programming, photography, music, and more.
